## **InterTrade Systems Announces New Strategic Alliance with TIE Commerce**

**InterTrade Systems announced today it has reached a partnership agreement that includes the purchase of the EDGE Desktop business in the US from TIE Holding N.V.**

As part of our alliance, InterTrade is acquiring the full EDGE Desktop Product Portfolio and will manage the day-to-day support and service for all EDGE customers. This addition to InterTrade Systems' portfolio of services complements the business applications suite of products with deployed software enabling EDI document translation locally for customers. InterTrade will provide existing users of the software continued support and will leverage the existing relationship to provide added value products in the mix.

In addition to the purchase of the software business from TIE, InterTrade will provide network connectivity to TIE Commerce customers as well as enhanced visibility products.

This announcement is directly in line with InterTrade's desire to add business portfolios to its offering as well as its growth by acquisition strategy.

### **InterTrade Systems Profile**

InterTrade offers innovative electronic commerce solutions that allow its clients to manage automated EDI/B2B interactions within their trading partner communities. Since 1996, InterTrade solutions have been making inter-enterprise collaboration and supply-chain optimization easier and more cost effective.
